

WHAT

Reduces swelling caused by impacts and cools down warmed or (over)heated muscles & tendons for preventing from inflammation.

- External muscle and tendon cold therapy for horses
- Relieves and cools pain and muscle soreness
- Reduce inflammation and swelling in joints and tendons
- Approved and certified product by FEI laboratory
- Contains **NO prohibited substances**
- Leaves no sticky residue and color shine

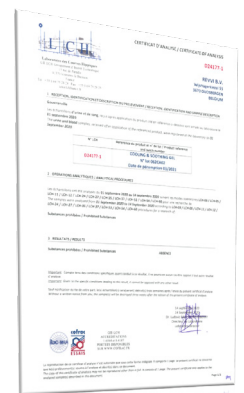

3 REASONS WHY

- **A more comfortable and longer lasting solution than the conventional ice pack method**
Our cooling gels are far more convenient to transport and can be used in situations where ice or cold water hosing may be inconvenient, impossible and irresponsible to use.
- **Ingrediënts in our gel have been used for thousands of years for pain relief in animal and human bodies**
Menthol and camphor are known as "counter-irritants" ingredients that relieves pain by triggering the sensory nerve endings to alter or offset pain in the underlying muscle or joints served by the same nerves.
- **Aids in reducing inflammation and swelling**
Some of our ingredients have a mild anti-inflammatory effect. This assists in the repair of both acute and chronic joint and tendon injuries.
 - **Acute injuries:** reduces the inflammatory response when applied immediately after an injury has taken place.
 - **Chronic injuries:** in the case of older or more chronic inflammation, it will increase blood circulation and reduces (the creation of) inflammation.

APPROVED & CERTIFIED

- The Equivi gels have gone through extensive doping tests by an official European FEI laboratory and are proven to be **free of prohibited substances**.
- The principal composition of the Equivi cooling gels are Waterbase (786mg/g), Castor oil (200mg/g), Mint leaf & Menthol (76mg/g) and Camphor (20mg/g).
- We do strongly encourage to check/inform with the respective jurors and their veterinarians at competition to the use of any medication.
- We recommend to not use more than 3 times in a 24h period.
(working efficiency of 2 to 3 hours)
